AP VoteCast 2018

NORC
at the UNIVERSITY *of* CHICAGO

Table of Contents

Study Methodology

AP VoteCast is a survey of the American electorate conducted in all 50 states by NORC at the University of Chicago for The Associated Press and Fox News. The survey is funded by AP. The survey of 138,929 registered voters was conducted October 29 to November 6, 2018, concluding as polls closed on Election Day. Interviews were conducted via phone and web, with 11,059 completing by phone and 127,870 completing by web.

AP VoteCast combines interviews with a random sample of registered voters drawn from state voter files; with self-identified registered voters conducted using NORC's probability-based AmeriSpeak® panel, which is designed to be representative of the U.S. population; and with self-identified registered voters selected from nonprobability online panels. Interviews were conducted in English and Spanish. Respondents received a small monetary incentive for completing the survey. Participants selected from state voter files were contacted by phone and mail, and had the opportunity to take the survey by phone or online.

VoteCast National Survey

The VoteCast survey of voters and nonvoters nationwide is compiled from results of the 50 state-based surveys and a nationally representative survey of 4,913 registered voters conducted on the probability-based AmeriSpeak panel (4,413 completed online and 500 via phone). It includes 40,153 probability interviews completed online (29,761) and via telephone (10,392), and 93,863 nonprobability interviews completed online (93,696) and via telephone (167). The margin of sampling error is plus or minus 0.8 percentage points for voters (n=116,792) and 1.8 percentage points for nonvoters (n=22,137). Registered voters in the District of Columbia were not included.

The overall AAPOR Response Rate 3 for the probability sample drawn from the state voter files was 4.2 percent. For the AmeriSpeak sample, the AAPOR Response Rate 3 was 11.8 percent. A response rate cannot be calculated for nonprobability sample. Harris' partners used routers as well as direct invitations for recruitment. Among the 105,695 panelists who touched the pre-screener instrument, 93,863 went on to complete the full survey

For those who screened into the survey as eligible based on being a registered voter in the state, the interview completion rates were 94.4 percent for the probability sample drawn from the state voter files, 97.3 percent for the AmeriSpeak sample, and 93.4 percent for the nonprobability sample. Due to quality control checks, 0.08% of respondents were removed from the final sample of completed interviews.

VoteCast State Surveys

In 25 states, VoteCast is based on roughly 1,000 probability-based interviews conducted online and via phone, and roughly 3,000 nonprobability interviews conducted online. In these states, the margin of sampling error is estimated to be plus or minus 3.5 percentage points for voters and 8.8 percentage points for nonvoters.

In 25 additional states, VoteCast is based on between 475 and 1,000 nonprobability interviews conducted online.[1] In these states, the margin of sampling error is estimated to be plus or minus 8.7 percentage points for voters and 19.2 percentage points for nonvoters.

State	Probability Interviews	Non-Probability Interviews	Number of Voters	Margin of Sampling Error for Voters (+/- pp)	Number of Non-Voters	Margin of Sampling Error for Non-Voters (+/- pp)
Alaska	-	477	366	12.5	111	18.1
Alabama	-	1,009	774	10.1	235	15.3
Arkansas	-	1,013	797	10.2	216	15.6

Mississippi	1,434	2,430	3,031	2.5	833	5.3
Montana	1,895	1,024	2,667	2.4	252	7.6

---

[1] In North Dakota, insufficient nonprobability sample was available. VoteCast collected 539 interviews from the registered voter list using the same postcard and telephone approach as the registered voter probability sample. These cases were treated as nonprobability cases in the weighting steps.

North Carolina	-	772	559	10.4	173	14.3
North Dakota		1,251	1,096	9.3	155	15.1
Nebraska	-	967	794	10.2	173	18.0

Washington	1,853	3,027	4,418	11.1	462	15.1
Wisconsin	2,256	3,032	4,709	1.9	579	5.8
West Virginia	1,273	2,184	2,623	1.8	834	5.4
Wyoming	-	532	377	2.5	155	4.4

Although there is no statistically agreed upon approach for calculating margins of error for nonprobability samples, these margins of error are estimated using a calculation called the root mean squared error and other statistical adjustments. Unlike a standard error, a root mean square error does not easily translate into a traditional statistical confidence interval for the vote count for an individual candidate or the vote differential between two candidates. However, a mean square error is a measure of uncertainty that incorporates the variability associated with the poll estimates, as well as the bias associated with the estimates derived from a nonprobability sample.

As with all surveys, VoteCast is subject to multiple sources of error, including from sampling, question wording and order, and nonresponse.

Sampling Details

Probability-based Registered Voter Sample

In each of the 25 states in which VoteCast includes a probability-based sample, NORC obtained a sample of registered voters from Catalist LLC's registered voter database. This database includes demographic

information, as well as addresses and phone numbers for registered voters, allowing potential respondents to be contacted via mail and telephone. The sample was stratified by state, partisanship, age and race. In addition, NORC attempted to match sampled records to a registered voter database maintained by L2, which provided additional phone numbers and demographic information. After the matching, NORC had phone numbers for 86 percent of sampled records, including cell phone numbers for 60 percent of records with a phone number. Prior to dialing, all probability sample records are mailed a postcard inviting them to complete the survey either online using a unique PIN or via telephone by calling a toll-free number. Postcards are addressed by name to the sampled registered voter if that individual is under age 35; postcards are addressed to "registered voter" in all other cases. Telephone interviews are conducted with the adult that answers the phone. Both online and telephone respondents provided confirmation of registered voter status in the state. Any individuals who registered after September 29, 2018 would not have been included on the sample frame. Registered voter lists are administrative records and subject to errors. NORC removed records with incomplete address information because a recruitment postcard would be undeliverable. Fewer than 1 percent of sample records were removed due to incomplete address information.

Nonprobability Sample

Nonprobability participants were provided via the Harris Panel, including members of its third-party panels. Harris Panel used random selection to select from their available panelists. In order to achieve the target number of completes, all adult panelists were sampled and eligible to be recruited. In large states with sufficient panel availability, panelists were recruited in batches so as not to exceed the target. Digital fingerprint software and panel-level ID validation is used to prevent respondents from completing the VoteCast survey multiple times. Nonprobability respondents provided confirmation of registered voter status in the state. While there is no way to quantify the size of the non-covered population for an opt-in panel, the primary population least likely to be included is those without internet access.

AmeriSpeak Sample

During the initial recruitment phase of the AmeriSpeak panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face). The panel provides sample coverage of approximately 97 percent of the U.S. household population. Those excluded from the sample include people with P.O. Box-only addresses, some addresses not listed in the USPS Delivery Sequence File and some newly constructed dwellings. AmeriSpeak panelists provided confirmation of registered voter status in the state.

Weighting Details

VoteCast employs a four-step weighting approach that combines the probability sample with the nonprobability sample, and refines estimates at a subregional level within each state. The 50 state surveys and the AmeriSpeak survey are weighted separately and then combined into a survey representative of voters in all 50 states.

State Surveys

First, weights are constructed separately for the probability sample (when available) and the nonprobability sample for each state survey. These weights are adjusted to population totals to correct for demographic imbalances of the responding sample compared to the population of registered voters in each state. The adjustment targets are derived from a combination of data from the U.S. Census Bureau's November 2016 Current Population Survey Voting and Registration Supplement, Catalist's voter file and the Census Bureau's 2017 American Community Survey. The variables used were:

- Sex (male, female)
- Age (18-34, 35-64, 65+)
- Race/ethnicity (Hispanic, NH-White, NH-Black, All Other)
- Education (less than high school/high school grad, some college, 4-year college grad, post-graduate)
- Age * race/ethnicity (18-34, 35-54, 55+ * NH-White, All Other)
- Education * race/ethnicity (less than HS/HS grad, some college, 4-year college grad+ * NH-White, All Other)
- Partisanship model score (strong Republican, lean Republican, lean Democrat, strong Democrat). Probability sample only
- Income (<= 25K, 25-50K, 50-75K, 75-100K, 100+K) Non-probability sample only
- County grouping using AP's party grouping (variable "AP_PARTY_REGION") Non-probability sample only

Prior to adjusting to population totals, the probability-based registered voter list sample weights are adjusted for differential non-response related to factors such as availability of phone numbers, age, race, and partisanship.

Second, all non-probability sample respondents receive a calibration weight. The calibration weight is designed to ensure the non-probability sample is similar to a probability sample in regard to variables that are predictive of vote choice that cannot be fully captured through the prior demographic adjustments. The calibration benchmarks are based on county level estimates from a multilevel regression and

poststratification model that incorporates all probability and non-probability cases nationwide. A national level logistic regression model was fitted using data from all states (both probability and non-probability samples) and AmeriSpeak to make predictions for registered voters at the state-level for Party ID (Democrat, Independent, Republican) and Country on Right/Wrong Track. These state-level predicted estimates are used as calibration benchmarks for the non-probability sample for all states. For Party ID, separate models were fitted for predicting the proportion of Democrats and proportion of Republicans. In addition, five separate models were fitted based on how the county voted in the 2016 Presidential election (i.e., based on % Trump vote for county/town). Models included the following individual level variables and county/town level variables:

- Flag for 18-34 year old registered voter
- Flag for 65+ year old registered voter
- Flag for female registered voter
- Flag for voting for Trump in 2016 Presidential election
- Proportion of non-Hispanic non-White in county/town
- Proportion 25+ years who are college educated in county/town
- Population density in county/town
- Median household income in county/town

Third, all respondents in each state are weighted to improve estimates for substate geographic regions. This weight combines the weighted probability sample (if available) and the calibrated non-probability sample, and then uses a small area model to improve the estimate within subregions of a state. We created between 8 and 30 regions (county groupings) for each state based on AP political and geographic strata, vote choice in previous elections, demographics, and the number of expected survey completes in each county. We then used these groupings to generate model-based estimates of vote choice among likely voters. For states with two or more statewide races, the small domain model was applied to the primary race.

For each state, there were two models: 1) predicting percent of vote share that goes for either of the two major parties' candidates, 2) predicting percent of major party vote share that goes for the Democratic/Republican candidate. The following variables were used as potential covariates in the model: 2016 Presidential election results, population density, median income, percent below poverty line, percent unemployed, percent college degree, portion on public assistance, percent insurance coverage, percent nonwhite, percent citizen, percent 18-34 years old, percent 65 and older, and percent who have

not moved in last year. For each state, we included in the models: 1) the 2016 presidential vote choice, and based on model fit, 2) a measure of socioeconomic status, 3) at least one demographic or geographic measure.

Fourth, the survey results are weighted to the actual vote count following the completion of the election. This weighting is done in 8-30 sub-state regions within each state.

National Survey

The national survey is weighted to combine the 50 state surveys with the nationwide AmeriSpeak survey. Each of the state surveys is weighted as described. The AmeriSpeak survey receives a nonresponse-adjusted weight that is then adjusted to national totals for registered voters derived from the U.S. Census Bureau's November 2016 Current Population Survey Voting and Registration Supplement, the Catalist voter file and the Census Bureau's 2017 American Community Survey. The state surveys are further adjusted to represent their appropriate proportion of the registered voter population for the country and combined with the AmeriSpeak survey. After all votes are counted, the national data file is adjusted to match the national vote for members of the U.S. House of Representatives within each state.

Contact

For more information, visit www.apnorc.org or email info@apnorc.org.

Using Weights

AP VoteCast is designed to be analyzed using weighted data. The data file includes different weights for different types of analyses.

- To produce estimates at the state level (e.g., percent of Californians who approve of President Trump), the state weights should be used.
- To produce estimates at the national level (e.g., the percent of registered voters nationwide who voted for a Democratic candidate for the House), the national-level weights should be used.

Additionally, the data file includes weights that represent results at two different stages of data collection.

- The FINALVOTE weights should be used to produce estimates that are adjusted to reflect the final vote counts in addition to demographic, geographic, and calibration adjustments. Certified vote count data was provided by AP. AP VoteCast recommends using these weights for most analyses.
- The POLLCLOSE weights can be used to produce estimates prior to any adjustments to final vote counts. These weights are provided for transparency of the methodology to permit comparison of the survey's estimates at poll close but prior to adjusting the survey outcome to match the final vote count.

To reproduce estimates in AP's publically-available VoteCast crosstabs of voters and estimates of voter demographics nationwide, limit analysis to LIKELYVOTER=1 and cases that are not missing RACE5_VOTE. The FINALVOTE_NATIONAL_WEIGHT variable should be used for weights.

To reproduce estimates in each state, limit analysis to LIKELYVOTER=1, the state of interest (using either P_STATE or STATENUM) and cases where vote choice in the race of interest (SENVOTE, SENSPVOTE, GOVVOTE) is not missing. The FINALVOTE_STATE_WEIGHT variable should be used for weights.

About The Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, objective social science research institutions in the world.

The two organizations have established The AP-NORC Center to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of The AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of The Associated Press. All work conducted by The AP-NORC Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of The AP-NORC Center is subject to review by its advisory committee to help ensure it meets these standards. The AP-NORC Center publicizes the results of all studies and makes all datasets and study documentation available to scholars and the public.

Index of Variables: *Listed in the order they appear on the file*

#	Variable	Question	Type	Length	Label
1	SU_ID	CASEID	Char	8	Case ID
2	POLLCLOSE_STATE_WEIGHT	N/A	Num	8	POLLCLOSE_STATE_WEIGHT. Weight for state-level analysis before adjusting to vote counts
3	POLLCLOSE_NATIONAL_WEIGHT	N/A	Num	8	POLLCLOSE_NATIONAL_WEIGHT. Weight for national-level analysis before adjusting to vote counts
4	FINALVOTE_STATE_WEIGHT	N/A	Num	8	FINALVOTE_STATE_WEIGHT. Weight for state-level analysis after adjusting to final vote counts
5	FINALVOTE_NATIONAL_WEIGHT	N/A	Num	8	FINALVOTE_NATIONAL_WEIGHT. Weight for national-level analysis after adjusting to final vote counts
6	MODE	N/A	Num	8	MODE. Survey mode.
7	P_STATE	N/A	Char	2	P_STATE. State - Character variable - State abbreviation
8	STATENUM	N/A	Num	8	STATENUM. State - numeric variable
9	LVA	LVA	Num	8	LVA. How interested are you in the election on November 6th in [STATE]?
10	LVB	LVB	Num	8	LVB. How likely are you to vote in the election?
11	LV	LV	Num	8	LV. Please indicate how likely it is that you will vote in this election.
12	LIKELYVOTER	LVB, LV, QPVVOTE, QPVVOTE3	Num	8	LIKELYVOTER. Likely Voter Model
13	WVA	WVA	Num	8	WVA. Did you vote at a polling place today, or did you vote by mail or in person at some point before Election Day?
14	WVB	WVB	Num	8	WVB. If you do vote in this election, which best describes how you plan to cast your ballot?
15	TIMEVOTE	WVA, WVB, P_STATE	Num	8	TIMEVOTE. Advance vote

150	ILBUDGET	ILBUDGET	Num	8	ILBUDGET. Approval of Governor Rauner handling budget deficit
151	CORRUPTION	CORRUPTION	Num	8	CORRUPTION. Assessment of corruption in state government

#	Variable	Question	Type	Length	Label
152	TEACHERSUNIONS	TEACHUNIONS	Num	8	TEACHERSUNIONS. Opinion of teachers unions
153	EDBUDGET	EDBUDGET	Num	8	EDBUDGET. Support for raising taxes to increase funding for public schools in state
154	TRANSPORTATION	TRANSPORT	Num	8	TRANSPORTATION. Support for raising taxes to increase funding for infrastructure in state
155	PROSTITUTION	PROSTI	Num	8	PROSTITUTION. Views of legal prostitution in Nevada
156	GOVWORKER	GOVWORKER	Num	8	GOVWORKER. Government worker
157	INCOMETAX	INCOMETAX	Num	8	INCOMETAX. Support for income tax in Washington state
158	ENERGY	ENERGY	Num	8	ENERGY. Views of energy policy in state
159	COALHH	COALHH	Num	8	COALHH. Work in coal industry
160	OPIOIDEXP	OPIOIDEXP	Num	8	OPIOIDEXP. Has had a family member or friend with addiction to opioids
161	ENDANGEREDSPECIES	ENDANGER	Num	8	ENDANGEREDSPECIES. Views of protections for animals and plants under the Endangered Species Act
162	MURKOWSKISC	MURKAKSC	Num	8	MURKOWSKISC. Approval of Lisa Murkowski's handling of Kavanaugh's confirmation
163	COLLINSSC	COLLINSSC	Num	8	COLLINSSC. Approval of Susan Collins' handling of Kavanaugh's confirmation
164	GASTAX	GASTAX	Num	8	GASTAX. Taxes on gasoline in California
165	HARRISPRES	HARRISPRES	Num	8	HARRISPRES. Would Kamala Harris make a good president, or not?
166	MURPHYPRES	MURPHYPRES	Num	8	MURPHYPRES. Would Chris Murphy make a good president, or not?
167	BIDENPRES	BIDENPRES	Num	8	BIDENPRES. Would Joe Biden make a good president, or not?
168	MAPRESWARREN	MAPRES	Num	8	MAPRESWARREN. Would Elizabeth Warren make a good president, or not?

#	Variable	Question	Type	Length	Label
169	MAPRESPATRICK	MAPRES	Num	8	MAPRESPATRICK. Would Deval Patrick make a good president, or not?
170	NYPRESBLOOMBERG	NYPRES	Num	8	NYPRESBLOOMBERG. Would Michael Bloomberg make a good president, or not?
171	NYPRESGILLIBRAND	NYPRES	Num	8	NYPRESGILLIBRAND. Would Kirsten Gillibrand make a good president, or not?
172	KLOBUCHARPRES	KLOBUCHARPRRS	Num	8	KLOBUCHARPRES. Would Amy Klobuchar make a good president, or not?
173	MERKLEYPRES	MERKLEYPRES	Num	8	MERKLEYPRES. Would Jeff Merkley make a good president, or not?
174	SANDERSPRES	SANDERSPRES	Num	8	SANDERSPRES. Would Bernie Sanders make a good president, or not?
175	UNFAIRFLGILLUM	UNFAIR	Num	8	UNFAIRFLGILLUM. Did Andrew Gillum attack DeSantis unfairly?
176	UNFAIRFLDESANTIS	UNFAIR	Num	8	UNFAIRFLDESANTIS. Did Ron DeSantis attack Gillum unfairly?
177	UNFAIRNJMENENDEZ	UNFAIR	Num	8	UNFAIRNJMENENDEZ. Did Bob Menendez attack Hugin unfairly?
178	UNFAIRNJHUGIN	UNFAIR	Num	8	UNFAIRNJHUGIN. Did Bob Hugin attack Menendez unfairly?
179	COMARIJUANA	COMARIJUAN	Num	8	COMARIJUANA. Assessment of legalization of marijuana for Colorado
180	REDTIDE	REDTIDE	Num	8	REDTIDE. Support for regulations to address Red Tide and other environment issues along Florida's coast
181	FIRSTBLACKGOV	FIRSTBLACKGV	Num	8	FIRSTBLACKGOV. How important is it to your vote that Stacey Abrams would be the first black governor of Georgia?
182	ALLOWEDVOTE	ALLOWEDVOTE	Num	8	ALLOWEDVOTE. Confidence that those who are eligible to vote in GA will be allowed to vote in the election
183	EASEVOTING	EASEVOTING	Num	8	EASEVOTING. Assessment of ease/difficulty of the process of voting for you in the election

#	Variable	Question	Type	Length	Label
184	EMERGENCYRESPONSE	EMERGENCY	Num	8	EMERGENCYRESPONSE. Confidence in Hawaii's emergency response systems
185	TRADEDEMVSREP	TRADEDR	Num	8	TRADEDEMVSREP. Better job handling trade
186	KSTAX	KSTAX	Num	8	KSTAX. Assessment of Brownback's tax policies for Kansas
187	MSHYDESMITHVSESPY	HSE	Num	8	MSHYDESMITHVSESPY. Hyde-Smith / Espy head-to-head
188	MSMCDANIELVSESPY	MCDE	Num	8	MSMCDANIELVSESPY. McDaniel / Espy head-to-head
189	PREEXISTINGCOND	PREEXISTING COND	Num	8	PREEXISTINGCOND. Importance of government prohibiting insurance companies from charging those with pre-existing conditions more money
190	Q2020EXCITEMENT	EXCITE2020	Num	8	Q2020EXCITEMENT. Excitement for 2020 presidential primary in state
191	HONESTMENENDEZ	HONEST	Num	8	HONESTMENENDEZ. Menendez is honest and trustworthy
192	HONESTHUGIN	HONEST	Num	8	HONESTHUGIN. Hugin is honest and trustworthy
193	TAYLOR	TAYLOR	Num	8	TAYLOR. Opinion of Taylor Swift
194	CONFEDERATEFLAG	CONFEDFLAG	Num	8	CONFEDERATEFLAG. Reaction to confederate flag
195	OROURKETOOLIBERAL	BETOTOOLIB	Num	8	OROURKETOOLIBERAL. Ideology of O'Rourke's positions on the issues
196	CRUZFOCUS	CRUZFOCUS	Num	8	CRUZFOCUS. Ted Cruz focused more on
197	ROMNEYTRUMP	ROMNEYTRUMP	Num	8	ROMNEYTRUMP. Preference for Romney if he's elected
198	QPVVOTE	QPVVOTE	Num	8	QPVVOTE. Voted in 2016
199	Q2016VOTE	QVOTE2016	Num	8	Q2016VOTE. 2016 vote
200	FIRSTTIME	FIRSTTIME	Num	8	FIRSTTIME. First time voter
201	QPVVOTE3	QPVVOTE3	Num	8	QPVVOTE3. Voted in 2014
202	WNV	WNV	Num	8	WNV. Biggest thing that might prevent from voting

#	Variable	Question	Type	Length	Label
203	BREAKA	BREAKA	Num	8	BREAKA. Do you think the way Democrats talk about politics these days is leading to an increase in acts of violence, or don't you think so?
204	BREAKB	BREAKB	Num	8	BREAKB. Do you think the way Republican talk about politics these days is leading to an increase in acts of violence, or don't you think so?
205	BREAKC	BREAKC	Num	8	BREAKC. Which best describes when you decided how you would vote?
206	SEX	SEX	Num	8	SEX. Sex
207	AGE65	AGE	Num	8	AGE65. Age, granular
208	RACETH	LATINO, CUBAN, RACE	Num	8	RACETH. Race/Ethnicity
209	RACETH5	LATINO, CUBAN, RACE	Num	8	RACETH5. Race/Ethnicity
210	CUBAN	CUBAN	Num	8	CUBAN. Cuban Heritage
211	EDUC	EDUC	Num	8	EDUC. Education, 4 categories
212	INCOME	INCOME1	Num	8	INCOME. 2017 household income
213	PARTY	PID1	Num	8	PARTY. Party ID (no leaners)
214	PARTYFULL	PID1, PIDI	Num	8	PARTYFULL. Party ID with leaners
215	IDEO	PHIL3	Num	8	IDEO. Ideology
216	RELIG	RELIGION	Num	8	RELIG. Religion
217	RELIG4	RELIGION	Num	8	RELIG4. Religion, 4 categories
218	BORNAGAIN	BORNAGAIN	Num	8	BORNAGAIN. Would you describe yourself as a born-again or evangelical Christian, or not?
219	SIZEPLACE	SIZEPLACE	Num	8	SIZEPLACE. Community type
220	FORMFLAG	N/A	Num	8	FORM. Questionnaire form - See questionnaire note for details

Variables #12, 15-40, 46-49, 208-209, and 214 are derived from more than one question.

Due to the risk of re-identification, the variables below were coded as '88 – REMOVED FOR DISCLOSURE RISK' for the respondents in the following states:

- RACETH – AR, CT, DE, FL, GA, IA, IL, MA, MO, ND, NE, NM, OH, OK, OR, SC, TN, TX. Please see RACETH5 for re-coded version with some categories collapsed to mitigate disclosure risk.

- RELIG – AK, AL, CT, IA, ID, KY, ME, ND, NM, RI, SD, UT. Please see RELIG4 for re-coded version with some categories collapsed to mitigate disclosure risk.

- MARRIED – AK, IA, ID, NE, NM, OK, SD, VT, and select respondents in CA, DE, MS, NH. Please see MARRIED2 for re-coded version with some categories collapsed to mitigate disclosure risk.

- TRANSGENDER – AK, AL, AR, CO, IA, ID, ME, NE, OK, VT.

- BORNCITIZEN – AZ, NM, SD, WY.

A full questionnaire corresponding to the "Question" column in the table above can be found packaged with these materials on www.apnorc.org.

Details of Variables

- "." Or space: logic skip, respondent is not applicable to a specific question
- 99: missing, survey non-respondent
- Weighted frequencies using FINALVOTE_NATIONAL_WEIGHT

MODE. Survey mode.			
MODE	**Frequency**	**Weighted Frequency**	**Percent**
(1) Phone	11,059	18,667,794	9.56
