

Women's Health Needs Study (WHNS)

The WHNS was a **one-time survey** that collected information on women's health care experiences and needs, as well as female genital mutilation/cutting (FGM/C).

The study took place from **November 2020** to **June 2021** in four metropolitan areas in the United States (**Atlanta, Minneapolis, New York, and Washington, DC**).

ELIGIBILITY

Women ages 18 to 49

Born, or mother was born, in a country where FGM/C is common

Spoke one of the study languages

WHO PARTICIPATED IN THE STUDY

1,132 WOMEN

AGE GROUP	31%		38%		31%			
	18-29 years old		30-39 year	30-39 years old		40-49 years old		
LEVEL OF EDUCATION	15%	22%	33	33%		30%		
	Less than high school/GED ^a diploma	High school/G diploma	_	Some college/Associate's degree		Bachelor's degree or higher		
IMMIGRATION GENERATION		87%				10%	3%	
- 13			1.0 Generation Immigrated to the U.S. at age 13 or older		1.5 Generation Immigrated to the U.S. before age 13			
MARITAL STATUS		619	%	14	%	25%		
	Married/Living with partner			Previo marri	-	Never married/ Lived with partner		

WHO PARTICIPATED IN THE STUDY

1,132 WOMEN
COUNTRY OF ORIGIN b ^

- $^{\rm b}$ Woman's birth country or mother's birth country if woman was not born in eligible country.
- $^{\rm c}$ West Africa includes Burkina Faso, The Gambia, Guinea, Mali, Mauritania, and Sierra Leone.

ACCESS TO HEALTH CARE FOR ALL WOMEN IN THE STUDY

HEALTH INSURANCE COVERAGE

Over half (52%) had Medicaid.

INTERPRETER

27% prefer an **interpreter** when visiting their health care provider.

Among women who prefer an interpreter, 2 in 3 (66%) were offered one during their last visit.

REPRODUCTIVE HEALTH

77%

of women reported having had a pelvic exam or Pap smear within the last 3 years; 17% never had an exam; 6% had one 4 or more years ago.

51%

of women reported having ever used birth control. 29% of women used birth control in the last 30 days.

45%

of women who had a child reported ever having a C-section. 31% of births were delivered by C-section.

18%

of women who reported ever having sexual intercourse were under 18 at age of first sexual intercourse; 59% were 18 to 24; and 23% were 25 or older.

FGM/C EXPERIENCE

The World Health Organization defines female genital mutilation/cutting (FGM/C) as all procedures involving partial or total removal of the external female genitalia or other injury to the female genital organs whether for cultural, religious, or other non-therapeutic reasons.¹

Over half of women reported experiencing FGM/C.

55%

experienced FGM/C.

45%

did not experience FGM/C.

EXPERIENCE OF WOMEN WITH FGM/C

BY COUNTRY OF ORIGIN

The percentage of women from each country of origin who reported experiencing FGM/C:

• **Somalia: 74**%

West African countries^d: 59%

Eritrea: 55%Sudan: 51%Ethiopia: 45%Egypt: 34%

By Age

Women With FGM/C Within Age Groups

1 in 4 (25%) women ages 18-24 have experienced FGM/C.

Nearly 3 in 4 (69%) women ages 40-49 have experienced FGM/C.

Age at FGM/C Among Women With FGM/C

By Type of FGM/C

Sewn closed
29%

Flesh removed
57%

Cut, no flesh removed, 2%

Don't know, 12%

- 29% said their genital area was sewn closed.
- 57% said **flesh was removed** from their genital area.
- 2% said their genital area was cut, no flesh removed.
- 12% did not know the type of FGM/C they experienced.

^d West African countries include Burkina Faso, The Gambia, Guinea, Mali, Mauritania, and Sierra Leone.

HEALTH CONCERNS OF WOMEN WITH FGM/C

67% reported **a problem with childbirth** compared to 49% of women without FGM/C. This includes postpartum bleeding, extensive vaginal tears from childbirth, or emergency C-sections.

47% reported a **reproductive health problem** compared to 23% of women without FGM/C. This includes difficulty passing period blood, difficulty passing urine, pain with urination, or many urinary tract infections.

44% reported a **sexual health problem** compared to 17% of women without FGM/C. This includes pain or bleeding during sex.

35% reported **feeling sad** for many weeks at a time compared to 24% of women without FGM/C.

COMFORT OF WOMEN WITH FGM/C IN TALKING TO PROVIDER

58% would feel comfortable discussing their FGM/C with a health care provider.

31% have **discussed their FGM/C** with a health care provider.

FGM/C ATTITUDES OF ALL WOMEN SURVEYED

91% believe FGM/C should be stopped.

87% believe FGM/C can cause health problems later in life.

82% do not believe FGM/C is required by religion.
